# TEŽA ODLOČITVE

DI Arch. GREGOR REICHENBERG

Maribor, 25. 5. 2022

Razmišljanja o neprestanem notranjem razkolu arhitekta v odnosu z okolico, med *iskrenostjo* osnovne potrebe in *iskrenostjo* potrebe po več.

Kaj predstavlja civilizacijski napredek?

Kaj pomeni prostor?

Kaj pomeni biti arhitekt?

Zakaj hrepenimo po več?

Zakaj imamo barvne obleke, če so osnovni materiali drugačni?

Zakaj so avtomobili barvno lakirani, če bi zadostovala samo protikorozijska zaščita?

Zakaj ni dovolj zgolj kompaktna fasada?

Zakaj imamo za isti namen več parov čevljev?

Zakaj cesta v urbanem prostoru nima prihodnosti?

**A TRULY REMARKABLE INVENTION**

Just fill the Revigator at night. The water remains in contact with the radium ore walls 12 hours. By morning the water has returned to that healthful state found only in genuinely fresh water right at the springs. It is flavorless and odorless and is neither a medicine nor a drug. Just that restored element of freshness generated by the tiny explosions that occur when the radium rays strike the water. This water gives such health and vigor that science calls it "the vitamin element of water." You have never tasted water so soft and palatable, except at genuine radio-active health springs.
